HITCHIN BOYS' SCHOOL

Year 7 Curriculum Maps

This document outlines the curriculum that each subject will aim to cover each term. Each subject has provided an overall learning focus with a more detailed outline of how learning will take place, through the content that will be taught and the skills that will be learnt and reinforced. The learning of each student is then assessed. The intended assessments are outlined by each department in their curriculum maps below. Across all subjects there will be a range of summative and formative assessments that ensure our intended Year 7 curriculum at Hitchin Boys' School is assessed in a balanced and fair manner to all. Further details on how each subject will assess students can be found in our Assessment and Feedback Policy found <a href="https://example.com/here/beach-subject-will-assess-students-subject-will-assess

Year 7 Curriculum Maps 2024-25

Subject: Art and Design

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Focus	Formal Elements	Featured Artist: Hokusai	Featured Artist: Kelly Standford Egyptian History in Art	Featured Artist: Joan Danziger Insects	Featured Artist: William Morris Islamic Art and beliefs	Featured Artist: William Morris Islamic Art and beliefs
Content and Skills	Colour Colour Theory		Written analysis of featured artist Design Development Colour blending 3D Form Design Development Sculptural forms Material manipulation		Written analysis of featured artist Pattern Design Stylisation Tessellation Rotation Reduction printing Printmaking- Mono and Lino	Written analysis of featured artist Pattern Design Stylisation Tessellation Rotation Reduction printing Printmaking- Mono and Lino

Subject: Computer Science

	(Rotation 1)	(Rotation 1)	(Rotation 1)
Content	e-Safety & Google Interland (2) Programming essentials in Scratch: part I Year 7 (6)	Spreadsheets Year 7 (6)	Impact of Technology - Collaborating Online Respectfully Year 7 (6)
Skills	Aim: This unit and the following unit ('programming 2') is to build learners' confidence and knowledge of the key programming constructs. This unit focuses on the development of the following key techniques: Sequencing Variables Selection Operators Count-controlled iteration National curriculum links	Aims: The unit uses engaging activities to progress learners from using basic formulas to writing their own COUNTIF statements. This unit focuses on spreadsheet skills. They will need to know how to: • Use cell references • Use the autofill tool • Format data • Create formulas for add, subtract, divide, and multiply • Create functions for SUM, COUNTA, AVERAGE, MIN, MAX, and COUNTIF • Sort and filter data • Create graphs • Use conditional formatting National curriculum links	Aims: This unit has been designed to ensure that learners are given sufficient time to familiarise themselves with the school network. Whilst completing this unit, learners will also learn how to use presentation software effectively. In terms of online safety, this unit focuses on respecting others online, spotting strangers, and the effects of cyberbullying. National curriculum links
Assessment	This unit contains two homework activities that ask a set of multiple choice questions as well as an end of topic assessment via Google Form.	The summative assessment for this unit will be in the form of a set of multiple choice questions via Google Form.	The summative assessment for this unit will be in the form of a set of multiple choice questions via Google Form.

	Table tennis bat project	Food Preparation and Nutrition
Content	Introduction to design skills and development. Introduction to design terminology such as form and function. Introduction to design companies such as Alessi Use of anthropometric data. Iterative development of designs Introduction to timbers properties and uses. Introduction to Health and safety in the workshop through making skills such as: Use of saws Use of files Use of sanding machines Use of finishes	Food Preparation and Nutrition is one area within Design and Technology. Students need to understand how ingredients work together, introducing Food Science and Cooking Methods. It will teach more challenging food preparation skills and develop confidence and understanding of nutritional and sustainable food products.
Skills	Research skills: Product analysis - focussing on form and function. Design skills Sketching, shading, and annotating of design ideas to communicate clearly to others. Making skills Focussing on mastery of basic making skills and developing confidence in the workshop, resulting in a high-quality outcome.	Skills and techniques Identify hazards using knives, how to use them and avoiding food poisoning and cross contamination. Identify what is a healthy lifestyle and the Eatwell guide. Develop an understanding of cooking techniques and cooking methods. Use knowledge on how to prepare, cook and present, using the correct cooking method, combining, and shaping the food product.
Assessment	 Mid unit assessment of research/design work, self, peer and teacher assessed End of topic test using self-marking google form. End of topic self/peer/teacher assessment of practical outcome using set descriptors. 	 Kitchen and knife safety assessment Weighing and measuring Self, peer and teacher assessed practical. Teacher assessment of all practical work -prepare cook and present. End of topic test/rotation google form. Written/theory marked with feedback. 7.

Subject: **Drama** Year: **7**

**
HITCHIN BOYS' SCHOOL
An Academy Trust

	Autumn	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Content	Introduction to Drama This unit is the first the students have in Drama at Hitchin Boys' School. It is designed to introduce and/or consolidate subject knowledge to Year 7 students, introducing key devising techniques and understanding of basic dramatic conventions.	Mythology This unit allows students to explore different stories from Greek mythology and use one to devise a performance	Comedy and Pantomime This unit allows students to explore the place of comedy within Drama. It also enables students to experiment with different styles of comedy.	Runaways- Jeff's Story This unit allows the students to explore issue- based drama, looking at the reasons that might lead a young person to becoming a runaway and where help can be found.	The Art of Communication This unit of work aims to introduce students to some of the core skills of working with voice. Looking at how we use our voice for communication and to convey meaning. By the end of the unit students will have written an introduction and an opening scene for a radio drama, which utilises the key skills they have learned.	Harry Potter and The Cursed Child This unit allows students to explore a scripted text and the ways in which we bring a text from page to stage.
Skills	Drama games for communication and confidence. How to form an effective still image. What is the difference between spontaneous and rehearsed improvisation? Short introduction to physical theatre. How to use narration effectively. What is a flashback/ flashforward?		Slapstick Silent movies Pantomime Stand- up- jokes, anecdotes, puns, impressions, deadpan. Sit-com Comic timing Script work Commedia D'ell Arte Archetypal characters Stereotypes	Proxemics Issue based Drama Duologues Thought tracking Rehearsed improvisation Flashback Freeze frame Documentary style drama Narration Voice over	Basics of voice work Pitch Tone Volume Pace Diction Intonation Emphasis Script writing Ensemble work Rehearsal	Still image Rehearsal techniques Relationships Proxemics Physical theatre Comic timing Exaggerated physicality Devising a monologue
Assessment	Creating and performing a modernised fairy tale. Responding orally to their own and others' work and completing a short written quiz on Google Forms. Progress Check 1	Creating and performing a devised performance based on a Greek Myth. Responding orally to their own and others' work and completing a short written quiz on Google Forms.	Creating and performing a linear mime. Responding orally to their own and others' work and completing a short written quiz on Google Forms.	Creating and performing a documentary style performance. Responding orally to their own and others' work and completing a short written quiz Google Forms. Progress check 2	Creating and performing a radio play performance. Responding orally to their own and others' work and completing a short written quiz on Google Forms.	Performing a scripted scene from the play Responding orally to their own and others' work and completing a short written quiz on Google Forms.

Subject: **English** The World and I

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
	Novel Study	Shakespeare	The poetry of the natural landscape	Family Connections	Film Studies: Other Cultures	Novel Study
Content and Skills	The Graveyard Book by Neil Gaiman. A gothic text exploring the importance of community, alongside themes of compassion, forgiveness, family, fate and morality.	A Midsummer Night's Dream by William Shakespeare. 'The course of true love never did run smooth'. The nation's favourite comedy, exploring themes of love, the play within the play, the significance of dreams, gender and the supernatural.	A selection of poems focused on exploring the relationship between us, our landscapes and our environment. The unit takes some of the greatest poetry from the British Romantic period and mixes it with poetry from modern global communities.	A range of inspirational and fascinating extracts taken from biographies, diaries and memoirs. The unit explores the concepts of identity, change, challenge and connectedness.	An in-depth study of Spirited Away - a seminal Japanese animated children's film exploring identity, greed, isolation and loss of the past.	My Sister Lives on the Mantelpiece Annabel Pitcher's awardwinning novel explores themes of grief, growing up and bigotry in the age of terrorism, tying together the year's study.
Skills	Writing - Fiction Write a short narrative or descriptive piece	Reading - Literature Analysis of a short extract	Reading - Non-Fiction Analysis of a poem	Writing - Non-Fiction Written non-fiction piece	Reading - Literature Analysis of a film clip	Reading/Spoken Language Presentation to foster oracy, on a given theme from the text

	Autumn	Spring	Summer
Content	Fantastic places What is a Geographer? What are the 3 different types of Geography? An introduction to the world, including continents, oceans, landscapes & landforms. Ecosystems - Great Barrier Reef Scale and variation - Russia Settlements - Rio de Janeiro Waterfalls - Victoria Falls Volcanoes - Mount St Helens Cold Environments - Antarctica Rivers - The River Ganges OS Map skills in Hitchin	UK Landscapes How can we locate the UK on different scales? What are the physical features of the UK? What is a physical landscape? How do river, coastal, and glacial processes (of erosion, transportation and deposition) operate? How do these processes shape physical landscapes? What can OS maps tell us about physical landscapes? Case studies of physical landscapes	Under the Global Economies What is happening down on the farm? Why is manufacturing about choosing the right site? Why did Nissan locate in the UK? Why is the tertiary sector increasing? How does a chocolate bar connect sectors of the economy? How does the UK trade with other countries? What is globalisation and how is it measured? How has containerisation accelerated globalisation? Why are so many goods made in China? What is the informal economy in Nigeria? Is North Korea a switched off country?
Skills	Cartographic skills Atlas skills – navigating physical and political maps Use of physical and political maps to examine unfamiliar environments. OS Maps, including grid references, use of scale, symbols, relief Use of geographical information systems (GIS) Graphical Skills Drawing cross profiles Other Interpretation of photographs and geographical sources Numeracy - calculation and percentages	Cartographic skills OS Maps, including grid references, use of scale, symbols, relief Use of geographical information systems (GIS) Graphical skills Interpreting line graphs and bar graphs Other Interpretation of photos and satellite images Creating and presenting using PowerPoint Creation of sequenced diagrams as a form of geographical explanation (eg. processes and landforms)	Cartographic skills Use of historical and contemporary maps for comparison and to examine trade Use of OS Maps to identify areas of specified land use, and to aid decision-making Graphical skills Construction and interpretation of pie charts Other Interpretation of images/cartoons (use of layers of inference) ¬ Decision-making scenario – how to make informed decisions using geographical evidence
Assessment	1. Mid unit Google form comprising of multiple-choice questions. 2. End of topic test using an OS map extract, completed in class in timed conditions.	 Extended written piece with a criterion on the journey down the River Tees. End of topic test on a combination of geographical knowledge and skills requiring the use of PEEL paragraphs. 	 Mid unit Google form comprising of multiple- choice questions and longer questions requiring the use of PEEL paragraphs. End of topic test on a combination of geographical knowledge and skills requiring the use of PEEL paragraphs, completed in class

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2		
Content	Ancient Civilisations "What did the Romans ever do for me?" - What did the Romans leave in Hitchin? -How smooth was the Roman takeover of Britain? - What legacy did the Romans leave? - Was life in Rome better quality? - Were the Romans the best of the ancient civilisations? - Why did the Roman empire collapse?	Early Medieval England "Does the 'Dark Ages' deserve its reputation?" - How were the kingdoms in England run? - Were the Vikings ruthless killers or keen explorers? - How did England become a united country?	Norman Conquest "Why was England a battlefield in 1066?" - Why was there a leadership contest in 1066? - Why did Harold have a nightmare year? - How did William assert control over England? - Were the people of England better off under William?	The Crusades "Was Jerusalem worth fighting for?" - Why did people join the crusades? - What was it like to fight in the Holy Lands? - How similar were Richard and Saladin? - Did the crusades achieve their aims?	Medieval Rulers "Were medieval rulers good at their jobs?" - How important were medieval queens? - Why was there a murder in 1170? - Why was King John so unpopular? - Was the Magna Carta too revolutionary? - Why did the English struggle with their neighbours?	The end of the Middle Ages "Were people happy to see the end of the Middle Ages?" - Why did the world nearly end in 1384? - What was it like to live in the shadow of the Black Death? - What was the problem between England and France? - Which household deserved to rule?		
Skills	Conceptual focus: Change; continuity; similarity; contrast; significance; interpretations; evidence (primary & secondary) Skills focus: Chronological thinking; comprehension; analysis; interpretation; research; judgement

Subject: **Maths** Year: 7

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
C o n t e n t	Whole Number Theory Ordering Numbers Written Methods Calculator Methods	Converting Units Factors and Multiples Fraction Calculations Percentages	Introduction to Algebra Simplifying and Substitutings Linear Graphs Generating Sequences	Representing Data Summary Statistics Pie Charts	Properties of 2D shapes Angle Rules Area and Perimeter	3D Representations Summer Projects

terms odd, even, prime, square, cube, root, integer, decimal Identify prime numbers less than 20 Order positive and negative integers and decimals Use <, >, ≤, ≥, =, ≠. Order decimals Know the conventional order for performing calculations involving brackets, four rules, powers, roots Know that addition and subtraction. multiplication and division, powers and roots are inverse operations and use this to simplify and check calculations Use non-calculator

S

Understand and use the

Use a calculator and other technologies to calculate results accurately and then interpret them appropriately.

methods to calculate the

sum, difference, product

and quotient of positive

numbers and decimals

and negative whole

Use and convert standard units of measurement for length, mass, volume/capacity, time and money
Understand and use the term factor, multiple
Find the Highest Common
Factor and Lowest Common
Multiple of two whole
numbers by listing

Recognise and use equivalence between simple fractions

Use <, >, ≤, ≥, =, ≠. Recognise and use equivalence between mixed numbers

Calculate a fraction of a quantity. Calculate with fractions greater than 1 Add, Subtract, Multiply and Divide simple fractions including negative fractions. Carry out more complex calculations, including the use of mixed numbers and improper fractions

Understand percentage is 'number of parts per hundred' Interpret percentages as a fraction Convert between fractions. decimals and percentages Calculate a percentage of a quantity (with or without a calculator) Increase or decrease a quantity by a simple percentage including simple decimal percentages Express one quantity as a percentage of another, with or without a calculator Apply percentage changes to simple interest problems

Understand that unknown variables (pictures/letters etc.) can be used to model and solve problems Use and understand the concepts and vocabulary of expressions, equations, formulae, terms Writing simple algebraic expressions to show quotients and products Formulate simple formulae and expressions from real world contexts Simplifying algebraic expressions by collecting like terms Simplifying algebraic products (include coefficients and powers) Substitute positive and negative numbers into expressions and formulae to find the value of the subject

Work with x- and y- coordinates in all four quadrants
Interpret, where appropriate simple expressions as functions with inputs and output.
Use a table of values to plot graphs of linear functions
Find and interpret the gradient and intercept of straight lines, graphically and using y=mx+c Use the form y=mx+c to find and sketch equations of straight lines.

Generate a sequence by spotting a pattern
Describing a sequence using the term to term rule
Generate a sequence using a term to term rule, given algebraically or in words
Generate a sequence from a formula for the nth term

Investigate the link between nth term rule and table of values from linear equations. (Pattern in y values, gradient etc)

Recognise sequences of triangular, square and cube numbers, and simple arithmetic progressions Recognise Fibonacci sequences

appropriate to the data type including tally charts, frequency tables and pictograms, composite bar charts Recognise graphical misrepresentation through incorrect scales, labels etc. Calculate the mode and range for ungrouped data Find the modal class and estimates of the range for grouped data. Understand why they are estimates Calculate the median for ungrouped data Find estimates of the median for grouped data. Understand why they are estimates Calculate the mean for ungrouped Understand the advantages and disadvantages of summary statistics Compare data sets using 'like for like' summary values Calculate averages from graphical representations Problem solving with summary statistics

Interpret and construct charts

Interpret charts appropriate to the data type; pie charts for categorical data. (Values given on pie chart) Calculate estimates of mode from graphical representations of data Interpret charts appropriate to the data type; pie charts for categorical data.

Construct charts appropriate to the data type; pie charts for categorical data.

Construct charts appropriate to the data type; pie charts for categorical data

Interpret pie charts using unitary method with degrees to solve problems

Know the terms pentagon, hexagon, octagon, regular polygon

Know the basic properties of isosceles, equilateral, scalene and right angled triangles
Use these facts to find lengths in rectilinear figures

Know the basic properties of the square, rectangle, parallelogram, trapezium, kite and rhombus
Use these facts to find lengths in rectilinear figures
Draw diagrams from written descriptions. Use the standard convention for labelling and referring to the sides and angles of a triangle eg. AB, angle ABC
Use a ruler to construct and measure straight lines
Use a protractor to construct and measure angles

Know the terms acute, obtuse, right and reflex angles Use the standard convention for labelling and referring angles eg. angle ABC

Know and use the sum of the angles at a point is 360 degrees, the sum of the angles on a straight line is 180 degrees, vertically opposite angles are equal, the sum of the interior angles of a triangle is 180 degreesInclude algebraic expressions for angles

Derive and use the sum of the interior angles of a quadrilateral

Apply these angle facts to find angles in rectilinear figures

Know and use alternate angles on parallel lines are equal

Know and use corresponding angles on parallel lines are equal

Know and use co-interior angles sum to 180 degree Recap all rules and multi step problems Properties of 2D shapes and Angle rules

Calculate the perimeter of rectilinear shapes Include algebraic expressions
Apply perimeter formulae in calculations involving the perimeter of 2D composite shapes
Find the area of 2D shapes by counting squares
Know and apply the formula for area of a square/rectangle, area = base x height
Know and apply the formula for area of a parallelogram, area = base x height
Calculate the area of a trapezium
Apply area formulae in calculations involving area of composite 2D shapes

Recognise the terms face, surface, edge and vertex

Recognise and know the properties of the cube, cuboid, prism, cylinder, pyramid, cone and sphere

Draw nets of cuboids and other right prisms

Calculate the surface area of cuboids and other right prisms (excluding cylinders) using nets

Using isometric paper

Interpret plans and elevations of simple 3D solids

Solve simple surface area problem from diagrammatic information provided in plan and elevation diagrams for cuboids and solids made from component cuboids.

Construct plans and elevations of simple 3D solids and representations

Construct solids from plans and elevations (using isometric paper)

Subject: **Music** Year: **7 Mission:** To ensure all students have some level of music literacy.

Year 7 have 3 lessons of Music per fortnight, so they cover 3 units of work per term.

Data drops: Sing Together, The Planets

	Autumn 1	Autumn 2	Autumn 3	Spring 1	Spring 2	Spring 3	Summer 1	Summer 2	Summer 3
Content	Rhythm and Pulse Students learn how rhythm and pulse work together. They learn to read, write and perform a range of ostinati and create a performance in small groups.	Pitch and Notation Students learn how to read pitch on the stave and combine this with their knowledge of rhythm notation in order to play a short piece of music on the keyboard in small groups.	Sing Together Students will be introduced to the elements of music, learn about the mechanics of singing and participate in various group singing tasks.	Gamelan Students combine knowledge of pitch and rhythm in order to compose a piece of music in the style of Indonesian gamelan.	Carmen Students learn how to glean meaning from operatic music by studying Carmen by Bizet. They compose their own piece of music based on one of the themes from the opera.	Singing 2 Students will be learning how songs tell stories in shows and films. Focus on harmony singing and creating scenes based on songs.	The Planets Students are introduced to the instruments of the orchestra by listening to selections from The Planets by Holst. They compose a piece of music using one of the planets as a stimulus.	Pictures at an Exhibition Students look at the links between music and painting by studying Mussorgsky's Pictures at an Exhibition. They create a piece of music based on a painting.	Adverts Students create an advert in small groups, using music to help sell their product/enhance the advert.
Skills	Performing: Ensemble performing skills Listening/appraising: Reading and writing rhythm notation	Performing: Keyboard introduction Basic keyboard techniques Listening/appraising: Pitch notation introduction	Performing: Singing - Warm ups, unison singing and singing in 2 parts. Listening/appraising: Learn about the mechanics and how our bodies produce sound.	Performing: Timing and ensemble Composing: Pitch and rhythm combined Listening/appraising: Learning about the culture of gamelan in Indonesia	Performing: Timing and ensemble Composing: Using elements to create expressive music Notation: pitch and rhythm combined Listening/appraising: Learning about Opera Musical elements	Performing: Singing in songs in harmony, building singing technique and create their own scene Listening/appraising: Listen to a range of music that tells stories	Performing: Timing and ensemble Composing: Using elements to create expressive music Listening/appraising: Learning about the orchestra Musical elements	Performing: Timing and ensemble Composing: Using elements to create expressive music Listening/appraising: Analysing music and visual art Musical elements	Performing: Presentation, spoken and musical performance Composing: Creating music suitable for their advert. Other: Technology: using software to film and edit an advert.
Assessment	Performance, written notation	Performance	Written assessment on the elements of music and how our bodies produce sound.	Composition, performance, written notation	Composition, performance, written notation	Performance	Composition, performance, written notation	Composition, Performance	Composition, performance

Subject: **Physical Education** Year: 7-9

Please note the curriculum map and assessment system follows the same pathway from Yr7-9. The objective is to gain greater mastery of the skills and content during each year whilst developing understanding of each activity. Whether this be a greater understanding of the rules, knowledge, or application of skill into a game-based scenario or tactical elements of those curriculum areas.

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Skills Content	Autumn 1 Groups 1-3: Rugby Group 4 + 5: Basketball, Health Related Education and Indoor Athletics Rugby – 'Hands' Passing, tackling, moving, breakdown skills Rugby – 'Head' Application of skills into game. Knowledge of rules. Understanding of tactics and techniques Rugby 'Heart' Leadership. Work ethic. Self-analysis and goal setting	Groups 4+5: Rugby Group 1-3: Basketball, Health Related Education and Indoor Athletics Basketball/HRE/Indoor athletics — 'Hands' BB - Movement, passing, running, shooting HRE/Indoor Ath — A variety of disciplines in indoor Track and field. Fitness programme put in place to develop physical ability in gym setting. Basketball/HRE/Indoor athletics — 'Head' BB — Application of skills into game. Knowledge of rules. Understanding of tactics and techniques. Specifically screening and 'plays' in attack and defense. HRE/Ind Ath — Applying techniques into understanding of tactics etc. Developing a knowledge of the body and how to develop their fitness using a training plan. Basketball/HRE/Indoor athletics — 'Heart' Leadership. Work ethic. Self-analysis	Groups 1+2: Hockey Group 3-5: Badminton, Gymnastics and Table Tennis Hockey – 'Hands' Passing, tackling, moving, 2v1 skills, hitting, slapping and elimination skills Hockey – 'Head' Application of skills into game. Knowledge of rules. Understanding of tactics and techniques Hockey 'Heart' Leadership. Work ethic. Self-analysis and goal setting	Groups 3-5: Hockey Group 1+2: Badminton, Gymnastics and Table Tennis Badminton/Gymnastics/ Table tennis - 'Hands' Bad - range of skills required: serving, backhand, forehand, clear, drop shot and smash. Table tennis - Forehand and backhand. Serve. Different types of spin and technique required for each Gymnastics - Core shapes, movement, balance, group work. Leading into more complex balances, leading to a sequence. Flight work and vaulting. Badminton/Gymnastics/ Table tennis - 'Head' Bad/TT - Application of skills into game. How to move your opponent around. Understand how to highlight your strengths and opponents' weakness. Scoring system and core techniques. Badminton/Gymnastics/ Table tennis - 'Heart' Leadership. Work ethic. Self-analysis	Groups 1+2: Athletics and Cricket Group 3-5: Tennis, Volleyball, Dodgeball Athletics and Cricket 'Hands' Athletics – Full range of track and field events. Focus on transferable skills in throws. Learn the difference between pacing and sprinting. Develop sprint skills and starting technique. Hurdles technique developed. Cricket – Different shots and technique. Defense, drive, sweep, hook. Bowling skills Fielding skills Athletics and Cricket 'Head' Athletics – tactical understanding of events. Applying into competition Knowledge of body and how to develop this for competition Cricket – develop knowledge of fielding skills and tactics. Bowling awareness of different types, spin or seam. Offside and onside. Knowledge of the different types of cricket and tactics needed for each. Athletics and Cricket 'Heart'	Groups 3-5: Athletics and Cricket Group 1+2: Tennis, Volleyball, Dodgeball Tennis/Volleyball/ Dodgeball – 'Hands' Tennis - range of skills required: serving, backhand, forehand, clear, drop shot and smash. Volleyball – dig, set, smash and how to combine these shots together Dodgeball – throwing, dodge technique, catching and combining these skills. Tennis/Volleyball/ Dodgeball – 'Head' Tennis/Volleyball/Dodgeball - Application of skills into game. How to move your opponent around. Understand how to highlight your strengths and opponents' weakness. Scoring system and core techniques. Tennis/Volleyball/ Dodgeball – 'Heart'
Assessment	Students will complete Assessment for Learning booklet which enables them to evaluate their progress, strengths and weaknesses and set goals for the following term/year. Students will also get a mark out of 25 for each activity	Students will complete Assessment for Learning booklet which enables them to evaluate their progress, strengths and weaknesses and set goals for the following term/year. Students will also get a mark out of 25 for each activity. Students will also get a mark out of 25 for each activity.

	Autumn 1	Autumn 2 - Spring 1	Spring 2 - Summer 1	Summer 2
Assessment	Understanding key terms explored so far, extended writing piece on the importance of vision and values at HBS (completed in class). Presentation of Belonging Shield (completed at home) exploring students' own communities, with extended writing to develop reasoning skills using a model given by teacher, (completed in class)	Understanding of religious key terms and concepts using Google Forms (completed in class) Extended writing piece whereby students evaluate a statement given by the teacher. Use of reasoning, analysis and evaluation skills. Application of their own view as well as from religious and nonreligious perspective (completed in class).	Designing a moral code for Christians, applying understanding on the importance of moral codes and the message of religious teachings (completed in class). Google form to assess knowledge and understanding of Buddhist moral principles (completed in class)	Google Form assessment to assess knowledge and understanding of worship across different faiths (completed in class). Extended writing piece on the importance of worship, assessing evaluative skills and using PEEL paragraph structures (completed in class).
Content	Introduction to Religious Studies Belonging Which communities do you belong to and why are they important? What makes a community? Our HBS community Friendship Community The Sikh Community The Christian Community The Humanist Community Belonging Shields - Which communities do you belong to and why are they important?	Key Beliefs How do we define religion, and what are some of their central beliefs? What is religion? (7 dimensions) How are symbols used in religion? What do Christians believe about God? What do Christians believe about life after death? What do Hindus believe about God? What do Hindus believe about life after death?	Sources of Wisdom What is a source of wisdom and how do they influence religious believers? What do religions share? How is Jesus a source of authority for Christians? What is the incarnation? How could Jesus perform miracles? What are the key teachings from Jesus? What are Moral Codes? How are the Three Refuges a source of authority for Buddhists? Exploring the Life of the Buddha What does the Buddha teach about karma and enlightenment? How do the 5 Precepts influence Buddhists? How does the Eightfold Path influence Buddhists? How can the Sangha help Buddhists achieve enlightenment? Why are the Gurus an important source of wisdom for Sikhs?	Worship How and why do religious people worship? What is worship and why is it carried out? Becoming a Khalsa Sikh Exploring the Gurdwara What is Sewa? What's the difference between private and public worship? Exploring the Church What are the roles of Church leaders? How do Muslims follow the 5 pillars of Islam? Exploring the Mosque Meditation as a form of worship Exploring the Buddhist Temple
Skills	Develop religious and theological literacy, as well as skills in analysis and evaluation Symbols and Actions	Develop religious and theological literacy, as well as skills in analysis and evaluation Beliefs and Practices	Develop religious and theological literacy, as well as skills in analysis and evaluation Sources of Wisdom	Develop religious and theological literacy, as well as skills in analysis and evaluation Prayer, Worship and Reflection Identity and Belonging

^{*} The skills incorporated are based on the Herts Agreed Syllabus

Subject: Science Year: 7

	Autumn	Spring	Summer	Summer 2
Content	Introduction to science:	<u>Forces</u>	<u>Light</u>	Sports Science
	Safety in the laboratory	Introduction to forces	Sources of light	Respiratory system
	Laboratory equipment	Stretch/squash force	Reflection	Breathing
	Measuring liquids	Friction	Refraction	Inhaled exhaled air
	Transferring solids	Mass / Weight	The eye and the camera	Peak flow and height
	The Bunsen burner	Balanced/Unbalanced forces	Colour	Blood oxygen level and exercise
	Heating Equipment	Streamlining	Lenses	Exercise and breathing
	Variables - Independent, dependent	Air resistance	Pinhole cameras and periscopes	Exercise and carbon dioxide
	and control	Flight		production
	Graphs		<u>Reproduction</u>	Muscle systems
		Human body	Puberty	
	<u>Particles</u>	Cells, Tissues, Organs	Reproductive system	<u>Sound</u>
	Solids, liquids and gases	Skeleton	Fertilisation	Waves
	Melting and Freezing	Joints	Pregnancy	Speed of sound
	Boiling	Muscles	Menstrual cycle	Using an oscilloscope
	Diffusion	Human parasites	Reproduction in plants	The ear
	Gas pressure	Mosquito nets	Germination	Changing pitch
	Crystallisation		Seed dispersal	Echoes
	Elements & Atoms	Reactions		Ultrasound
		Chemical / Physical change	Acids and Alkalis	
	Cells	Making compounds	Testing acids and alkalis	
	Microscopes	Word equations	pH and universal indicator	
	Animal/Plant cells	Chemical formula	Comparing indicators	
	Specialised cells	Conservation of mass	Neutralisation	
	Diffusion in cells	Burning	Making Salts	
	Osmosis	Thermal decomposition	Basic Titration	
	Unicellular organisms	Exothermic and Endothermic reactions	Testing Indigestion tablets	
Skills	Scientific Attitudes and	Scientific Attitudes and Investigative	Scientific Attitudes and Investigative	Scientific Attitudes and
	Investigative Skills	<u>Skills</u>	<u>Skills</u>	Investigative Skills
	Heating water investigation	Investigating the effect of forces on	Testing the law of reflection and the law of	Investigating the link between
	Effect of temperature on diffusion	springs (Hooke's Law)	refraction.	exercise and breathing rate.
	investigation	How changing surfaces affects friction	Investigating how coloured light affects	Comparing the composition of
	Gummy bears osmosis investigation	Investigating how shape affects	object appearance.	inhaled vs exhaled air.
	Model animal and plant cells	aerodynamics	Using	
	Recording data and observations	Paper plane investigation.	Observing neutralisation reactions using	Evaluation, Maths and
	Making and testing hypothesis		indicators.	Measurement

Exaluation, Maths and Measurement Evaluating experimental results - is the data accurate, precise and valid? How can experiments be improved? Correct graphical method. converting mass to weight Assessment 1. End of unit Google form comprising multiple-choice questions "Knowledge Check". 2. End of term test completed in class under exam conditions. Exaluating differences between chemical and physical changes Recording data and observations Making and testing hypothesis Investigating the effectiveness of different indigestion solutions Making and testing hypothesis Investigating the effectiveness of different indigestion solutions Making and testing hypothesis Investigating the effectiveness of different indigestion solutions Evaluating experimental results - is the data accurate, precise and valid? How can the speed of sound be measured most accurately? Making an indicator and evaluating its use. Evaluation, Maths and Measurement How can the speed of sound be measured most accurately? Making an indicator and evaluating its use. Evaluation stills (high level measurement). 1. End of unit Google form comprising multiple-choice questions "Knowledge Check". 2. End of term test completed in class under exam conditions Evaluating experimental results - is the data accurate, precise and valid? How can the speed of sound be measured most accurately? Making an indicator and evaluating its use. Evaluation, Maths and Measurement How can the speed of sound be measured most accurately? Making an indicator and evaluating its use. Evaluation of termites provided? Making and testing hypothesis Investigating the effectiveness of different indigestion solutions How can experimental results - is the data accurate, precise and valid? How can experimental results - is the data accurately? Making and testing hypothesis Investigating the effectiveness of different indigestion solutions How can the speed of sound be measured most accurately? Making and testing hypothesis Investigating the effectiveness of different		T		I 5 11 11 11 11	I = 1
Recording data and observations Making and testing hypothesis How can experiments be improved? Evaluating experiments be improved? Correct graphical method.
